*Here to help every step of the way*

We offer **specialized support** to victims and their families when the sexual abuse of a child has been recorded and possibly distributed on the Internet.

**Specially-trained caseworkers will:**

- Assist you in accessing specialized support, available funding and emerging options for moving forward
- Work to limit the public availability of abuse images
- Ensure your voice/views as a survivor (family) are heard
- Inform you of new resources
